

Coded Vessel & Liferaft

SKU - 40021033

Brass Thermo Hygrometer

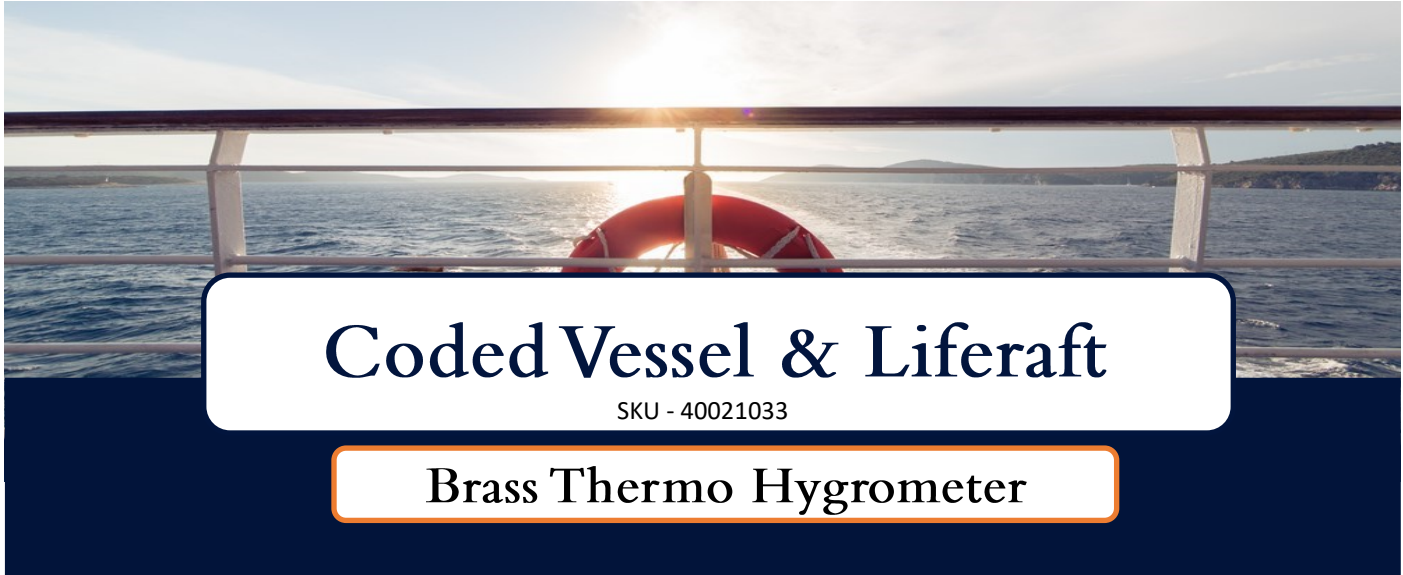

This brass Thermo Hygrometer measures 45cm in depth, with a base diameter of 95mm and a dial diameter of 70mm. It provides accurate temperature and humidity readings for both indoor and outdoor environments. Featuring a clear display, it allows for easy monitoring of climate conditions. Its compact design and reliable performance make it suitable for various applications, including home, office, and weather stations.

KEY FEATURES

- **Material:** Durable construction to withstand various environmental conditions for reliable use.
- **Measurement:** Reads both temperature and humidity, providing accurate data for indoor and outdoor climates.
- **Display:** Classic face readout on the dial ensures easy and clear visibility of readings.
- **Function:** A dual measurement monitors both temperature and humidity simultaneously.
- **Application:** a versatile thermo hygrometer that is suitable for vessels, boats, homes, offices, weather stations
