

# LIFTING ARRANGEMENTS

SKU - 40020210

## Handybilly Block & Tackle

### DESCRIPTION

Our Handybilly manual lifting arrangement includes 2 x 3" galvanised GMI block and tackle and 20m of 10mm polypropylene braided line. Once assembled 20m of line will give an approximate lift of 9m, all of this is contained within a purpose made PVC bag which helps with easy of use and untangled deployment.

### Contents

2 x 3" Single galvanised GMI blocks c/w safety hook & becket  
1 x 20m length of 10mm Polypropylene braided cord - Suitable for lifts of up to 9m  
1 x PVC Stowage bag 50cm x 29cm

\*Longer lines can also be supplied upon request to allow for larger freeboards\*

# Lifting Arrangements

## Handybilly Block & Tackle

When suspending the lifting strop from the block ensure that it fits into the seat of the hook, that it does not exert any side pressure, and that the safety catch is closed.

- Never attempt to lift or lower more than the SWL (150 kg) of the equipment.
- Do not impose sudden or shock loads.
- Ensure that the load is directly in line with the appliance. Do not side load the equipment.
- Never lift on the point of the hook.

### Legend

1. Two x single blocks, each with safety hook and made up with plaited line.
2. Touch-and-close fastening to tackle pocket.
3. Upper block with hook painted white, ready to attach to the tripod.
4. 750mm of line to be secured to prevent its loss.
5. Plaited line packed into its bag.
6. Line bag touch-and-close fastening.
