

## ANTI-STATIC HELICOPTER EARTHING POLE

NATO APPROVED—NSN 5120-99-728-7485

### SPECIFICATION

1. Steel hook / probe 150cm
2. 10mm copper earthing wire sheathed in plastic and securely attached to the steel hook. Normally the wire is 5 metres in length, but alternative lengths may be fitted if requested.

**Note:** the UK Civil Aviation Authority (CAA) suggest a wire length of between 3.5m and 5m

3. Wooden stave 1.35 / 2.0 metres.

**Note:** CAA state that the handle should be at least 85cm

4. The sheathed earthing wire is tightly whipped to the wooden stave to ensure that in use no weight comes on the wire-probe connection
5. Earth connection.

Alternatives:

- a) Crocodile Grip clamping device
- b) 1.2m copper rod
- c) 4kg steel weight
- d) 160mm stainless steel spike\*

\* Unit has NATO Stock No. 5120-99-728-7485

- e) as requested

6. Foam grip extending not less than 30cm along the handle.
