

MARINA SAFETY STATION

SKU - 40020198

HIGH PROFILE

Description

These cabinets are manufactured using highly UV resistant and very strong ABS injection moulded plastic for the back and polycarbonate for the lid. The high quality of the lid makes it easy to check the state of the gauge without needing to open the door.

The door can be hinged on the left or the right hand side to suit tight machinery spaces and is fitted with a very effective EPDM seal to prevent water/dust ingress.

The throwline container has a screw cap secured with a chain. Alternatively a lifebuoy can be fitted in it's place with two ABS grips. All parts are highly resistant to corrosion.

SPECIFICATION

Dimensions (mm) Height x width x depth: 1029 x 335 x 318

Weight Kg: 8.4Kg

Colour: Red/Grey

Material: Body UV stabilised ABS/Polycarbonate/ polyethylene

Hinges & handle: Polypropylene

Shelf: ABS

Seal: EPDM

Post and foot: GRP
