

MARINA SAFETY STATION

SKU - 40020121

LOW PROFILE

Description

These cabinets are manufactured using highly UV resistant and very strong ABS injection moulded plastic for the back and polycarbonate for the lid. The high quality of the lid makes it easy to check the state of the gauge without needing to open the door.

The door can be hinged on the left or the right hand side to suit tight machinery spaces and is fitted with a very effective EPDM seal to prevent water/dust ingress.

The backboard holds two ABS grips to secure any lifebuoy from 560mm to 762mm with a throwing line in the centre. All parts are highly resistant to corrosion.

SPECIFICATION

Dimensions (mm) Height x width x depth: 1029 x 335 x 318

Weight Kg: 8.4Kg

Colour: Red/Grey

Material: Body UV stabilised ABS/Polycarbonate/ polyethylene

Hinges & handle: Polypropylene

Shelf: ABS

Seal: EPDM

Post and foot: GRP
