SKU - 40021064

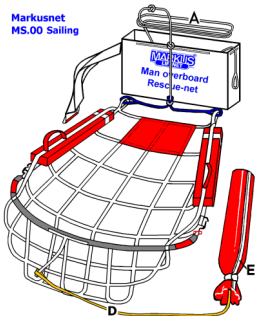

Markus Overboard Rescue Nets MS.00 (Sailing) to MS.02 (Boating)

## DESCRIPTION

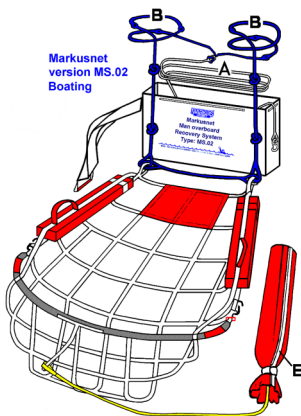

The MarkusNet MS.00 Sailing and MS.02 Boating nets are designed for small deck boats, such as sailing yachts, with no strong railing. Ideal for rescue boats with a light boom and winch (min. 500 kg) or a block and tackle (1:4 ratio), the net includes a 14-metre attachment line with 3 knots and a 25-metre buoyant throw-line in a throw-bag with a chest loop. Packed in a durable PVC/polyester fabric bag with straps and buckles, it's suitable for boats with a lifting height of less than 2 metres to a 90 cm railing or gunwale.

Boating

## KEY FEATURES

- Complete recovery system: Rescues conscious or unconscious persons, ready for hoisting or climbing aboard.
- MS.00 & MS.02 Models: Allow immediate recovery up to 20m from the boat.
- MarkusNet MS.00 Sailing: Enables quick response to man-overboard situations and brings the person to safety.
- MarkusNet MS.02 Boating: Similar to MS.05 to MS.30, but in a compact white PVC bag; ideal for small deck boats.
- Maritime approval (MS.02): May require local authority approval for commercial use.
- Dual-direction boat hook: Easily pulls under an unconscious person for recovery.
- Lifts under the person: Smoothly hoists the person.
- Easy entry with lifejacket: Accessible even with bulky lifejackets.
- Rescue swimmer security link: Secures the swimmer to the boat during rescue.
- Compact for small boats: Designed for boats with limited deck space.
- Versatile rescue options: Multiple methods for handling man-overboard situations.
- Multiple entry points: Enter the net from different angles.
- Ladder & securing tool: Functions as both a ladder and a securing device for unconscious casualties.

Markus Overboard Rescue Nets MS.00 (Sailing) to MS.02 (Boating)

## SPECIFICATION

- Weight of net structure: 2.5 Kg
- Soft White Bag Size : L65 x H40 x W12 cm
- Total Weight: 6kg
- 

Product No.	For Leisure boat with	Total Weight Kg
40021063	no strong railing	6
40021064	For leisure boat with strong railing -Max 2 m height.	6

## TECHNICAL INFORMATION

### Dimensions & Weight:

- Net Structure: L1.8m x W1.5m, Weight: 2.5kg
- Total Length: MS.00: 39m, MS.02: 41.5m
- Total Weight in Transport: 6kg

### Lifting & Attachment:

- Attachment Line A: 14m (both models)
- Lifting Lines B: 0m (MS.00), 2.5m (MS.02)
- Throw-line D: 25m (both models)

### Performance:

- Load Tested: Over 500kg
- Float Tested: >10kg capacity
- Chest Loop Circumference: 1.4m
- Tensile Strength: Over 500kg

### Packing & Instructions:

- PVC Bag Size: L65 x H40 x W14 cm, Volume: 0.037m<sup>3</sup>
- Basic Use Instructions on the lid

### Definitions:

- Lifting Height: From water to rail/gunwale.
- Lifting Arrangements: Includes lifting lines, straps, and link points.
