## B-Line™ Throw Line Rescue Buoy

The Glasdon B-Line™ Throw Line Rescue Buoy is a lightweight, high-performance water rescue device. Its streamlined design allows for greater throw distance and accuracy, whether deployed vertically or horizontally, improving the likelihood of a successful rescue.

### KEY FEATURES

- **Easily Thrown with Accuracy:** Increases chances of successful rescue by enabling precise deployment from a distance.
- **Buoyant and Strong:** Provides reliable flotation and support, ensuring the rescuee remains afloat during the rescue.
- **Soft Nose Reduces Risk of Injury to Casualty in Water:** Minimises potential harm to the person in distress during deployment.
- **Easy to Re-Throw:** Allows for quick, efficient re-deployment if needed, saving valuable time in an emergency

## B-Line™ Throw Line Rescue Buoy

### SPECIFICATION

**Type:** Lightweight, buoyant water rescue device

**Design:** Streamlined for increased throw distance and accuracy, far surpassing traditional lifebuoys

**Key Features:**

- Easy to throw with precision for improved rescue success
- Buoyant and strong, ensuring reliable flotation
- Soft nose to reduce injury risk to the rescuee
- Quick and easy to re-throw for rapid deployment

**Benefits:**

- Helps reduce panic and supports regular breathing during rescue
- Enables safe recovery of the rescuee to shore

**Applications:** Ideal for emergency service vehicles, **Guardian™ Lifebuoy Housing**, and indoor pools

**Portability:** Compact and easy to store and carry for fast access in emergencies

### TECHNICAL INFORMATION

- Colour: Bright Yellow.
- Rope: Polypropylene.
- Sleeve: PVC-coated nylon.
- Strap: Polypropylene.
- Length: 685mm
- Diameter: 159mm
- Weight: 1.3kg
- Buoyancy: 4.14kg
- Rope: 31m of 6mm diameter polypropylene floating rope. Breaking strain - 550kg.
