SKU - 40020508

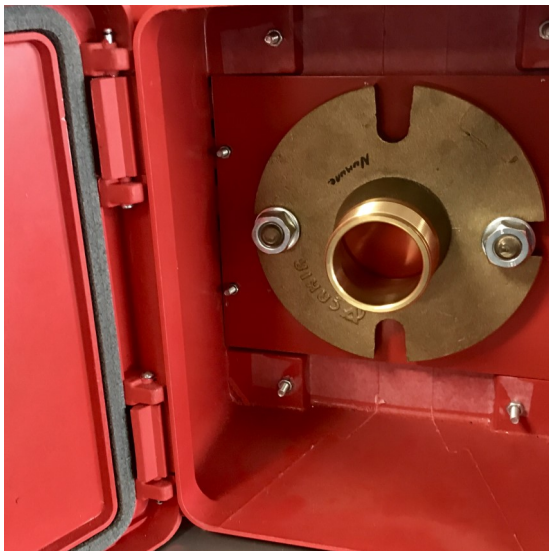

## International Shore Connection Kit

The International Shore Connection (ISC) is an indispensable safety feature for ships, providing a reliable standby hose attachment / marine firefighting equipment for onboard firefighting in the event of pump failure. This critical equipment enables ships to connect to shore or other vessels for a consistent supply of seawater at a predetermined pressure, which is then routed to the ship's fire main. To ensure your ship's safety, it's crucial to invest in high-quality ISC products and marine emergency equipment that meet industry standards.

### KEY FEATURES

- Standby hose attachment for onboard fire-fighting in case of pump failure
- Enables connection to shore or other vessels for a reliable supply of seawater
- Supplied at a pre-decided pressure and connected to the ship's fire main
- Ensures the safety of the ship and crew in emergency situations
- Provides a backup firefighting system in case of pump failure
- Offers a consistent and reliable supply of seawater for firefighting purposes
- Helps meet industry safety standards and regulations
- Available in a variety of high-quality options from reputable manufacturers

## International Shore Connection Kit

### SPECIFICATION

- Equipped with a standby hose attachment for onboard firefighting in case of pump failure
- Facilitates connection to shore or other vessels for a consistent and dependable supply of seawater
- Supplied at a predetermined pressure and seamlessly connected to the ship's fire main
- Safeguards the ship and crew during emergency situations
- Acts as a reliable backup firefighting system in the event of pump failure
- Provides a dependable and stable supply of seawater for firefighting purposes
- Complies with industry safety standards and regulations
- Offers a wide range of top-quality options from reputable manufacturers

### TECHNICAL INFORMATION

- Maximal pressure: 1.0 N / mm<sup>2</sup>
- Thread thickness: 2"
- Dimensions: 285 x 260 x 70 mm
- Weight: 3 up to 7 kg
