

## STROPS & HARNESSES

SKU - 40020468

Helicopter Lifting Strop – Approved with Certification

### DESCRIPTION

Designed for hoisting personnel from height. This Rescue Strop is manufactured from highly visible, fluorescent orange material – comprised with SOLAS-grade retro-reflective tape wrapped around the central padded, protective foam belt. The HV material, together with the hoops of retro-reflective tape, allow for easier detection in poor visibility or low-light conditions.

A webbing lift strap passes through the centre section and terminates in a stainless steel D-ring, with a safe working load of 125kg, and a proof load of 250kg.

### SPECIFICATION

- Individually tested
- Retro-reflective tape
- Inflatable lifejacket compatibility
- Hi-Vis outer cover
- Stainless Steel D-Rings
- Made from tough PVC
- Proof Load: 250kg
- Safe working load (SWL): 125kg
- Supplied with certificate of conformity
- Weight: 0.92kg
