Spencer Fixed Lifting Bridles

The Spencer Fixed Lifting Bridle (ST04522) is a four-point lifting system designed for the safe hoisting and recovery of casualties using Spencer basket stretchers from floor-mounted positions.

KEY FEATURES

- **Four-Point Attachment Design:** Securely connects to Spencer basket stretchers for stable, balanced lifting
- **Fixed Lifting System:** Provides reliable stretcher hoisting from floor-mounted positions
- **Four Fixed Lifting Straps:** Secure loop fastening with noose knot attachment for dependable lifting
- **Floor-to-Hoist Recovery:** Enables controlled casualty lifting and rescue recovery operations
- **Spencer Basket Stretcher Compatible:** Suitable for all Spencer manufactured basket stretchers
- **450 kg Static Safety Load:** High-strength lifting capability for demanding rescue operations
- **Reinforced Seams:** Improved durability for professional rescue environments
- **EN Compliant Carabiners:** Compliant with EN 362 and EN 365 standards
- **High Strength Materials:** Constructed from nylon, aluminium and steel for durability
- **Lightweight Design:** Weighs only 0.8 kg for easy transport and deployment
- **Fixed Belt Length:** 1600 mm / 1550 mm configuration for consistent lifting
- **Professional Rescue Use:** Designed for fire, SAR, offshore and technical rescue teams
- **Medical Device Compliant:** Class I Medical Device compliant with EU Regulation 2017/745

Spencer Fixed Lifting Bridles

SPECIFICATION

- **Intended Use:** Fixed lifting accessory for Spencer basket stretchers, designed for casualty recovery, vertical lifting and controlled rescue operations from a floor-mounted position
- **Safety Function:** Provides secure and balanced lifting of basket stretchers while maintaining stability during hoisting and evacuation procedures
- **Fixed Lifting System:** Designed specifically for floor-to-hoist recovery where a fixed-length bridle configuration is required
- **Four Fixed Straps:** Attach to basket stretcher lifting points using a noose knot fastening method to provide secure connection during lifting operations
- **Reinforced Seams:** Improve strength and durability for demanding rescue environments
- **EN Compliant Carabiners:** Supplied with carabiners compliant with EN 362 and EN 365 for secure attachment during lifting operations
- **Floor-Mounted Recovery:** Designed solely for lifting basket stretchers from ground level and controlled hoisting operations
- **Loop Fastening System:** Provides a secure and reliable connection between the bridle and Spencer basket stretchers
- **Compatible with Spencer Basket Stretchers:** Designed for use with all Spencer manufactured basket stretchers
- **High Strength Construction:** Manufactured from nylon, aluminium and steel for durability, reliability and performance in emergency rescue environments
- **Construction Materials:** Nylon (PA), aluminium (Al), steel

TECHNICAL INFORMATION

- Medical Device Classification: Class I Medical Device compliant with EU Regulation 2017/745
- CND Classification: V0899
- Belt Length: 1600 mm / 1550 mm
- Belt Width: 30 mm
- Weight: 0.8 kg (±0.1 kg)
- Materials: Nylon, aluminium and steel
- Fastening Type: Loop fastening system with noose knot attachment
- Number of Fastening Bands: 4
- Carabiner Standard: EN 362 and EN 365 compliant
- Compatibility: Spencer manufactured basket stretchers
- Maximum Static Safety Load: 450 kg (1000 lbs)
- Product Code: ST04522
