Spencer Rock Pin Spinal Board

The Spencer Rock Pin Spinal Board is a lightweight, buoyant spinal immobilisation board designed for emergency rescue and water recovery operations.

KEY FEATURES

- **Durable & Lightweight Construction:** High-density polyethylene (PE) construction with expanded polyurethane reinforcement provides excellent impact resistance while remaining easy to handle during rescue operations
- **Water Rescue Compatible:** Buoyant and waterproof design allows safe use during in-water rescue and marine casualty recovery operations
- **Multiple Carry Handles:** 16 integrated handles provide secure grip points for efficient lifting, carrying, and patient transfer by rescue teams
- **Integrated Pin Fixation System:** 14 strategically positioned pins provide multiple attachment points for spider straps and head immobilisers to improve patient stabilisation
- **Radiolucent Design:** Enables diagnostic imaging including X-ray, MRI, and CT scans without removing the patient from the spinal board
- **Tapered Storage-Friendly Shape:** Compact profile simplifies storage and transport in emergency vehicles, rescue boats, and equipment lockers
- **Easy-Clean Polyethylene Surface:** Smooth, non-porous surface allows quick cleaning and decontamination after use
- **High Load Capacity:** Supports casualties up to 350 kg, making it suitable for demanding rescue and emergency response environments
- **Universal Compatibility:** Designed to work with standard spider strap systems and head immobilisers for flexible patient restraint options
- **Equipment Identification System:** Compatible with Spencer Mark Up system to improve equipment tracking and reduce the risk of loss
- **Professional Rescue Application:** Suitable for emergency services, search and rescue teams, marine rescue, fire and rescue operations, and casualty evacuation
- **Medical Device Compliance:** Class I Medical Device compliant with MDR (EU) 2017/745 for professional healthcare and rescue applications

Spencer Rock Pin Spinal Board

SPECIFICATION

- **Construction:** manufactured from a single piece of high-density polyethylene (PE) with expanded polyurethane reinforcement for excellent impact resistance and durability
- **Water Rescue Compatible:** fully waterproof and buoyant design suitable for in-water spinal immobilisation and rescue operations
- **Multiple Handling Points:** features 16 integrated handles positioned to support safe and efficient patient handling during rescue operations
- **Integrated Pin System:** 14 strategically positioned pins provide multiple attachment points for spider straps and head immobilisers
- **Radiolucent Design:** allows diagnostic imaging including X-ray (XR), MRI, and CT scans without removing the patient from the spinal board
- **Tapered Profile:** space-efficient shape simplifies storage and transport in rescue vehicles and equipment lockers
- **Easy Cleaning Surface:** smooth polyethylene construction enables quick cleaning and decontamination after use
- **Mark Up Identification System:** compatible with Spencer Mark Up system for equipment identification and reduced risk of loss
- **350 kg Load Capacity:** suitable for demanding rescue, emergency response, and casualty immobilisation operations
- **Construction:** High-Density Polyethylene (PE) with Expanded Polyurethane Reinforcement

TECHNICAL INFORMATION

- Model Codes: ST02010, ST02012, ST02013, ST02014
- Product Type: Spinal Immobilisation Board with Pins
- Length: 186 cm (73.2 in)
- Width: 44.5 cm (17.5 in)
- Thickness: 5 cm (1.97 in)
- Weight: 6.7 ± 0.3 kg (14.7 ± 0.7 lb)
- Maximum Load Capacity: 350 kg (772 lb)
- Number of Pins: 14 integrated fixation pins
- Material: High-Density Polyethylene (PE) with expanded polyurethane reinforcement
- Construction: Single-piece injected polyethylene design for strength, durability, and water resistance
- Number of Handles: 16 integrated carry handles
- Colours: Red, Yellow, Military Green, Orange
