Ruth Lee Training Manikins

SKU - 40021262

Bariatric Training Manikin

Ruth Lee Bariatric Training Manikins are realistic heavyweight adult training manikins designed to help emergency services, healthcare, ambulance, fire and rescue, care homes, prisons, airlines, shipping and other organisations safely practise the handling, lifting, moving and rescue of plus-size and bariatric casualties.

KEY FEATURES

- **Waterproof Polyester Construction:** Tough, durable and easy to clean, with materials conforming to BS EN ISO 6330, OEKO-TEX® Standard 100 and ISO 17050-1.
- **Realistic Weight Distribution:** Anatomically distributed weight provides the realistic feel and movement of an unconscious casualty.
- **Fluidity of Movement:** 0.5kg weight packets create realistic movement rather than the rigid handling of a conventional weighted dummy.
- **Heavy-Duty Construction:** Designed to withstand demanding rescue exercises, including use under vehicles, concrete and steel lintels.
- **Team Rescue Training:** Suitable for rescue scenarios involving teams of 4–6 people, supporting realistic multi-person casualty handling.
- **Carrying Sheet:** Supplied with a carrying sheet with a safe working load of up to 600kg for moving and positioning the manikin.
- **Immobilisation Collar Compatible:** Neck design allows an immobilisation or extrication collar to be fitted for realistic casualty care training.
- **50kg Bariatric Model:** Provides the visual impact of a plus-size casualty without the physical demands of a heavier manikin, ideal for healthcare and equipment demonstrations.
- **Washable Design:** Waterproof materials can be washed with soapy water to help maintain hygiene between training sessions.
- **Flame-Retardant Padding:** 25mm polyurethane foam conforms to BS 2852: Part 2:1982 for added durability and safety.
- **Multiple Weight Options:** Available in 50kg, 90kg, 180kg and 260kg models to suit different training requirements.
- **UK Manufactured:** Made in the UK and manufactured to ISO 9001:2015 quality standards.

Bariatric Training Manikin

SPECIFICATION

- **Construction:** Waterproof polyester outer covering, conforming to BS EN ISO 6330, OEKO-TEX® Standard 100 and ISO 17050-1.
- **Weight Distribution:** Anatomically correct weight distribution provides the realistic feel of an unconscious casualty.
- **Durability:** Tough construction withstands demanding rescue training, including burial under concrete, steel lintels and vehicles.
- **Movement:** Distributed 0.5kg weight packets create realistic, fluid movement rather than a rigid heavy lump.
- **Carrying:** Supplied with a LOLER-certified carrying sheet with a safe working load of up to 600kg.
- **Team Rescue:** Designed for rescue scenarios requiring a team of 4–6 people.
- **Neck Design:** Neck allows fitting of immobilisation and extrication collars for realistic casualty care training.
- **Lighter 50kg Version:** Provides the visual impact of a plus-size casualty without the excessive weight of heavier models.
- **Cleaning:** Waterproof construction can be washed down with soapy water for easy cleaning.
- **Padding:** 25mm flame-retardant polyurethane foam conforms to BS 2852: Part 2:1982.
- **UK Manufactured:** Made in the UK and manufactured to ISO 9001:2015 quality standards.

TECHNICAL INFORMATION

- **Height:** 1.8m across all models
- **Weight Options:** 50kg, 90kg, 180kg and 260kg
- **Outer Material:** Waterproof polyester
- **Padding:** 25mm flame-retardant polyurethane foam, conforming to BS 2852: Part 2:1982
- **Weight Distribution:** 0.5kg weight packets distributed throughout the manikin
- **Carrying Sheet:** Supplied with a carrying sheet rated to a 600kg safe working load
- **Material Standards:** BS EN ISO 6330, OEKO-TEX® Standard 100 and ISO 17050-1
- **Quality Standard:** Manufactured to ISO 9001:2015 standards
- **Country of Manufacture:** Made in the UK
