

Ruth Lee Training Manikins

SKU - 40020479

Body Recovery Manikin

Enhance your police dive team's training with Ruth Lee's Body Recovery Manikins. These realistic and durable training tools are designed to prepare your team for real-life scenarios and provide the essential experience needed for successful body recovery operations.

KEY FEATURES

- Realistic Body Bagging with Anatomically Correct Weight Distribution
- Durable and Safe for Falls up to 5-6 Meters into Water
- Ideal Weight for Water Recovery with a Dry Weight of 50kg (Adult) and 10kg Underwater
- Quick Water Penetration and Drainage with Tough Nylon Mesh Carcass
- Easy Handling, Storage, and Suspension with Strong Webbing Loop
- Identification by Touch in Poor Visibility with Realistic Facial Features and Wig
- Flexible in Water and Prevents Bending with Built-in Polyethylene Strips
- Complete with Overall and Boots for Convenient Training and Replacement if Needed
- Trusted by Rescue Professionals in 26 Countries Worldwide
- Ruth Lee's Leading Markets Include the USA, Australia, and Germany
- Widely Used by UK Fire Services and Police Forces
- Approved by US Coast Guard (USCG)
- Relied Upon by Brisbane Water Police and State Emergency Services in Australia
- Trusted by Surf Life Saving Club WA

Body Recovery Manikin

SPECIFICATION

- Realistic weight distribution for realistic body 'bagging'
- Resilient construction able to withstand a fall from up to 5-6 meters into water with no damage
- Dry weight of 50 kg (Adult) that decreases to approximately 10 kg when submerged in water
- Nylon mesh body that allows for quick water penetration and drainage during training
- Strong webbing loop at the back for easy handling, storage, and suspension for drying
- Realistic facial features and wig for identification by touch in low visibility conditions
- Polyethylene strips for flexibility in the water but prevent bending during body retrieval
- Complete with overalls and boots that can be easily replaced if damaged
- Suitable for use by police dive teams, fire services, surf life-saving clubs, and state emergency services
- Regularly exported and used globally, including in the USA, Australia, Germany, and the UK
- Nylon mesh carcass with high-density polypropylene webbing
- Webbing rated to 207 kg (25mm) and 440 kg (50mm)
- SOLAS reflective tape compliant with USCG 46 CFR and IMO resolution A.658(16)
- Non-absorbent closed cell foam with low water absorption (1 Day < 0.1%, 28 Days < 0.5%)
- Constructed from the same material used in police ballistic/stab vests
- Compliant with OEKO-TEX® Standard 100, BS EN ISO 12947-2 & 14116: 2008 standards

Not Suitable For:

- Use in temperatures above 100°C or flashover scenarios
