Tactical Assault Ladder

The Fibrelight Tactical Assault Ladder is the perfect climbing solution for military and emergency services, offering incredible strength and lightweight construction. Whether you need to quickly ascend a building or scale rough terrain, this tactical military ladder is designed to meet the most demanding requirements. With its advanced technology and superior performance, the Fibrelight Tactical Assault Ladder is the ideal choice for those who demand the very best in climbing equipment.

KEY FEATURES

- The Fibrelight Assault Ladder is incredibly lightweight, making it easy to carry and manoeuvre in any situation.
- Unique design that enable the ladder to operate in complete silence, allowing for stealthy movement and discreet operations.
- Entirely free of metal parts, meaning that it is non-conductive and does not produce any radar signals, making it ideal for tactical situations.
- Modular design means that multiple units can be joined together, providing a flexible and versatile climbing solution for any scenario.
- The ladder can be loaded in either direction, making it easy to use and increasing operator convenience and safety.
- With a three-year manufacturer's warranty, you can trust that the Fibrelight Assault Ladder is a durable and reliable piece of equipment that will perform consistently over time.

MOB Cradles, Nets & Ladders

SKU - 40020517

Tactical Assault Ladder
