## SB Telescopic Boat Hook

The SB Telescopic Boat Hook is a reliable and sturdy piece of maritime equipment to easily moor or dock your boat. With a design that allows you to easily adjust the length of the hook from 1.7m in length and 3m fully extended making it perfect for boats of various sizes. Crafted with durable and lightweight aluminium, this boathook is easy to handle and manoeuvre, ensuring that you can quickly and easily secure your boat to a dock or buoy without any hassle. Plus, the non-slip grip ensures that you can maintain a firm hold on the hook, even in wet conditions.

### **KEY FEATURES**

A telescopic boat hook which is also used as the handle of the [SB Rescue Sling man over-board system](#).

- 1.7m in length and 3m fully extended for increased reach during distance recovery of casualty.
- A fully extended length of 4m can be obtained by using the telescopic boathook in conjunction with the 1m extension pole accessory
- Made from anodised aluminium for protection against the elements when used / stowed on-board a boat or vessel.
