

Inflatable Rescue Paths & Walkways

SKU - 40020461

12V Bravo Turbo Max Electric Inflatable Pump

The ICB Fast Path is an extremely robust rescue walkway that enables access to a casualty that cannot be reached due to the terrain, the path can be placed over water, mud or ice and gives a firm stable platform to allow the rescue to be performed, our paths are available in 2m, 5m & 10m joinable lengths as standard but custom sizes are available!

Our path is based on a 3 chamber catamaran design with each chamber having the feature of an isolation valve, this allows quick isolation of a damaged section in an emergency situation, the path is also provided with a easy to use repair kit.

Our walkways are 1.3m wide and available in 2m, 5m and 10m lengths , these lengths are also connectable. Each unit can be inflated be either using an electric pump or a [standard BA cylinder](#) for rapid deployment.

KEY FEATURES

- Manufactured from a tough, durable PVC that is made to withstand the elements
- Non slip, wipe clean surface to the top of the walkway
- 3 x Over pressure valves so the correct pressure is maintained and the path and sponsons are not overfilled.
- Each sponsons can also be inflated separately or not at all by isolating each side using the transfer valves
- Safety life lines running the full length of each side and D rings at both ends to allow for attachments
- 3 Chamber catamaran design with each chamber having an isolation valve
- Repair kit provided

Inflation Pumps, Cylinders & Accessories

SKU - 40020461

12V Bravo Turbo Max Electric Inflatable Pump

SPECIFICATION

- The I.C. Brindle 'Fast Path' walkway is designed to allow users to traverse over tough terrain such as water, mud, or ice with ease
- It is manufactured from tough PVC material that can withstand heavy usage.
- The walkway comes in a range of lengths, including 2m, 5m, and 10m joinable lengths as standard, with custom sizes available upon request.
- Its 3 chamber catamaran design includes isolation valves for added stability and safety.
- The walkway features an easy-to-use repair kit, ensuring it can be quickly fixed in case of any damage.
- Its non-slip and wipe clean surface provides added safety for users.
- The walkway includes an Over Pressure System consisting of 3 x Over Pressure valves, which help maintain correct pressure for optimal performance.
- The sponsons can be individually inflated for added safety and stability.
- The walkway is equipped with safety lines that run the full length of the walkway, ensuring maximum safety for users.
- D-Rings at both ends of the walkway allow for attachment options, making it easy to set up and use in different locations.
