## MED FireBuddy Plus Jacket

The MED FireBuddy Plus Jacket features a robust four-layer construction. The outer shell is crafted from aramid material, ensuring exceptional durability. The second layer consists of a waterproof breathable membrane, providing reliable protection against moisture. The third layer incorporates a meta-aramid/para-aramid felted thermal barrier, offering excellent heat resistance. Lastly, the fourth layer showcases a modacrylic/Lensing lining, enhancing comfort and breathability.

### KEY FEATURES

- Four-layer construction: Enhanced fire and heat protection.
- Aramid outer shell: Durable and flame-resistant.
- Waterproof breathable membrane: Keeps wearer dry with airflow.
- Meta-aramid/para-aramid thermal barrier: Excellent heat insulation.
- Modacrylic/Lensing lining: Comfort and added protection.
- Stand-up collar and elasticated cuffs: Secure fit, prevents heat entry.
- Zip closure with touch and close fastening: Adjustable and secure fit.
- Maximum protection: High-level fire resistance in hazardous environments.
- Comfortable wear: Breathable and comfortable even during prolonged use.
- Enhanced insulation: Minimizes risk of burns with excellent heat insulation.
- Secure fit: Snug and adjustable fit reduces heat exposure risk.
- Improved visibility: Optional fire-resistant retro-reflective tape for visibility.
- Safety standard compliance: Designed to meet rigorous safety standards.

## MED FireBuddy Plus Jacket

### SPECIFICATION

- Robust four-layer construction: Aramid outer shell, waterproof breathable membrane, meta-aramid/para-aramid thermal barrier, modacrylic/Lensing lining.
- Aramid outer shell: Exceptional durability and flame resistance.
- Waterproof breathable membrane: Keeps the wearer dry and allows air circulation.
- Meta-aramid/para-aramid felted thermal barrier: Excellent heat insulation for maximum safety.
- Modacrylic/Lensing lining: Comfortable wear and additional protection.
- Stand-up collar and elasticated cuffs: Secure fit and prevention of heat entry.
- Zip closure with touch and close fastening: Secure and adjustable fit.
- Maximum protection: High-level fire resistance for hazardous environments.
- Comfortable wear: Breathable and comfortable, even during prolonged use.
- Enhanced insulation: Minimizes the risk of burns with excellent heat insulation.
- Improved visibility: Optional fire-resistant retro-reflective tape for better visibility.
- Safety standard compliance: Designed and tested to meet rigorous safety standards.
- Sizing options: Available in sizes S to XL.
- FireBuddy Plus [Module B](#) and [Module D](#).

### TECHNICAL INFORMATION

- Sizing: S to XL
- Four-layer construction: Aramid | Waterproof breathable membrane | Meta-aramid/para-aramid felted thermal barrier | Modacrylic/Lensing lining
