

LIFEBUOY EQUIPMENT

SKU - 40020016, 40020016B, 40020017

ENCAPSULATED LIFEBUOY LINES

The encapsulated throwing line fits neatly inside either a 24" or 30" lifebuoy and provides the user with 20m of line if fitted to a 24" lifebuoy or 30m of line if fitted to a 30" lifebuoy.

Inside the casing is an orange buoyant 6mm plaited polyethylene line which when used enables easy retrieval of the Lifebuoy and in turn increases the chances of a successful rescue.

To use simply hold the thin end of the "milk-bottle"-shape in one hand, and throw the lifebuoy with the other.
