

Ruth Lee Training Manikins

SKU - 40020593

Mass Casualty Manikin

Budget-friendly manikin designed for scenarios that demand a high number of casualties. These light-weight manikins, weighing approximately 4kg, are ideal for multi-agency exercises where a large presence of casualties or bodies is necessary for visualization purposes rather than actual rescue operations. With their cost-effective nature, these manikins allow you to create a realistic scene without breaking the budget. They serve as valuable tools for multi-agency exercises, enabling responders to practice coordination and communication while visualising a large-scale incident.

KEY FEATURES

- **Lightweight and Water-Resistant:** Constructed from a lightweight and water-resistant polyester material, this manikin is highly durable.
- **Flame Retardant Foam Filling:** Filled with flame retardant foam pieces, ensuring safety during training exercises.
- **Adult-Sized and Anatomically Correct:** With a height of 1.8m, this anatomically correct manikin accommodates the use of regular clothing for enhanced realism.
- **Exceptional Durability:** Designed to withstand challenging conditions, these manikins can be buried under concrete or steel lintels without sustaining damage.
- **Resilient Construction:** Able to endure the impact of a 4x4 vehicle and survive being dropped from a second-floor window onto a concrete floor without any damage.
- **Easy Handling and Storage:** The lightweight na-
