

Ruth Lee Training Manikins

SKU - 40020595

Casualty Evacuation Manikin

The casualty evacuation training manikin is tailor-made for the Fire Fighter recruitment and annual fitness test mandated by the Chief Fire Officers Association. While the standard weight is set at 55kgs for UK FRS, customization options are available to meet your specific requirements. This manikin has been upgraded, with the construction materials improved to flame retardant Polyester, the same material used in Police ballistic/stab vests. .

KEY FEATURES

- **Realistic Weight Distribution:** Anatomically correct weight distribution provides a lifelike representation of an unconscious casualty, enhancing the authenticity of training scenarios.
- **Strong Webbing Loop:** The manikin is equipped with a sturdy webbing loop, allowing for easy handling, hauling, storage, and suspension for drying purposes.
- **Leg Protectors Included:** Supplied with leg protectors, making it ideal for drag tests. Replacement plastic strips for the leg protectors and additional leg protectors are available for separate purchase.
- **Water Repellent Material:** The manikin is made from water-repellent material, ensuring its suitability for wet or foul conditions encountered during training.
- **Soft Body Joints:** Soft body joints eliminate the risk of pinch welts and bruising, which are common injuries associated with plastic-bodied manikins.
- **Complete with Boots:** The manikin comes with boots included, and they can be easily replaced if damaged.
- **Used by Fire Services across the UK**
- **Additional Manikin Leg Protectors available** - constructed using tough, heavy duty Nylon.
