

# **FIRE** ISOLATOR

## Unpack the Fire Isolator blanket and cover the burning EV

Place the smart bag containing the Fire Isolator FI-BL0906 blanket in front of the car

Take the blanket out of the smart bag

Unfold the blanket to its full width

Pull half the blanket over half the car using the green loops

The car is now half-covered

Start second part covering by using the red or yellow loops

Make sure the blanket is high enough to prevent it from snagging and thereby damaging it

The blanket is now completely covering the car

The blanket is correctly installed
