SKU - 40100029

BRAVO 230/2000 PUMP

SKU - 4120011

BRAVO 230/2000 230V INFLATE/DEFLATE PUMP

Bravo GE 230/2000 consists of a main motor and a supplementary booster motor, which increases the capacity and pressure. The Main motor can run independently or with the push of a button can run simultaneously with the booster motor for maximum performance.

Both motors are protected by thermal-amperic fuses.

The inflation and deflation feature, high quality and performance figures of the Bravo 230 makes it perfect for use with our inflatable products.

As a guide the Bravo 230/2000 would fully inflate a 4m x 5m shelter in under 5 minutes !

120V version available on request
