## JB08LJS Lifejacket Cabinet

### DESCRIPTION

For the storage of up to 20 automatic lifejackets (not in bags). This cabinet is widely used in the Offshore energy and commercial marine sectors.

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for equipment stored inside in even the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The hinges are secured with 316 stainless steel nuts, bolts and washers.

The cabinet comes fitted with 1 x central shelf to store the lifejackets.

The door can be specified with left or right hinging and features a nylon rod handle to pull the door open to guarantee fast access even when wearing gloves.

### Standard specification:

#### Dimensions (mm)

Height x width x depth: 1474 x 918 x 477

Aperture: 1234H x 704W

Internal depth: 405
