

SOLAS Firefighter's PPE

SKU - 40020426

SOLAS Firefighter's Boots

DESCRIPTION

Designed to withstand 18kV and high temperatures, the SOLAS Firefighter's Boots feature a cold-insulating outsole construction for all-around climate resilience. The steel midsole provides exceptional puncture resistance. The inclusion of a steel toe cap (EN ISO 20345) enhances safety on the frontline.

KEY FEATURES

- **SOLAS Approved:** Ensures compliance with international safety standards for maritime operations, providing peace of mind in critical firefighting scenarios.
- **Toe Cap Protection:** Reinforced with a steel toe cap (EN20345) for superior impact resistance, safeguarding against potential hazards on the frontline.
- **Available in U.K Sizes 7-12:** Offers a comprehensive size range to accommodate a diverse range of firefighters, ensuring a comfortable fit for enhanced performance.
- **EN20345 Certification:** Meets European safety requirements, assuring reliability and adherence to rigorous quality standards.
- **Flame Retardant Rubber Upper:** Provides exceptional protection against flames, enhancing safety in high-risk firefighting environments.
- **Heat Insulation and Chemical Resistance:** Ensures durability and resilience in the face of extreme heat and exposure to chemicals.
- **Fuel Oil Resistant Outsole:** Features a slip-resistant rubber outsole that not only provides traction but also resists fuel oil, maintaining stability on potentially slippery surfaces.
- **18kV and High-Temperature Endurance:** Withstands high voltages and elevated temperatures, allowing firefighters to operate confidently in challenging conditions.
- **Cold Insulating Outsole Construction:** Maintains thermal insulation, keeping feet protected and comfortable in cold climates.
- **Steel Midsole:** Guards against punctures from pins and sharp objects, enhancing overall foot safety during firefighting operations.
- **Comfortable Woven Cotton Canvas Lining:** Prioritises wearer comfort, ensuring prolonged wear without compromising on performance.

SOLAS Firefighter's Boots

SPECIFICATION

- **Certification:** SOLAS approved, meets EN20345 standards for reliable safety in maritime firefighting.
- **Size Range:** Available in U.K sizes 7 - 12, catering to a diverse range of firefighters for optimal fit.
- **Toe Cap:** Steel toe cap reinforcement for impact protection and added safety.
- **Material:** Flame retardant rubber upper for resistance against flames, with heat insulation and chemical resistance.
- **Outsole:** Slip-resistant rubber outsole, fuel oil resistant for stability on various surfaces.
- **Endurance:** Withstands 18kV and high temperatures, ensuring durability in demanding firefighting conditions.
- **Cold Insulation:** Designed with a cold-insulating outsole construction, suitable for varying climates.
- **Puncture Resistance:** Steel midsole guards against punctures from pins and sharp objects, enhancing overall foot safety.
- **Lining:** Comfortable woven cotton canvas lining prioritizes wearer comfort during prolonged wear.

TECHNICAL INFORMATION

- SOLAS / MED approved firefighters boots with toe cap protection
- U.K sizes 7 - 12 .
- Approved to EN20345
- **Brand:** Dunlop
