Fibreight Self-Recovery Ladder

KEY FEATURES

The Fibreight Self-Recovery Ladder, an evolution of the Fibreight Emergency ladder, serves as a crucial life-saving tool tailored for fishermen working on vessels with minimal crews. Specifically designed for individuals who find themselves overboard, this self-recovery ladder empowers casualties to reboard their vessels by themselves.

- **Lightweight and Portable:** Easy handling, stowage, and transportation for convenient on-board manoeuvrability.
- **Suitable for Limited Crews:** Ideal for vessels with a low number of on-board personnel, ensuring safety in operations with minimal crew members.
- **Independent Man Overboard Recovery:** Facilitates self-recovery for individuals in the water, enabling casualties to reboard vessels independently with ease.
- **No Annual Servicing Requirement:** Eliminates the need for yearly maintenance, reducing costs and ensuring readiness without frequent servicing.
- **White 'Yacht' Variation Available:** Stylish white design available upon request, seamlessly blending with yacht aesthetics.
- **Versatile Size Configurations:** Available in 5 size configurations, adaptable to various vessel sizes and requirements.
