

Man Overboard Equipment

SKU - 40020798

Fibreight 'BOB+' MOB Manikin

DESCRIPTION

The Fibreight BOB Dummies are affordable training aids to assist users in practising the recovery of an unconscious casualty with a Fibreight cradle. BOB and BOB+ have undergone extensive testing to ensure they withstand the rigours of open water man overboard training.

BOB is designed for short usage during in-water training sessions. In contrast, BOB+ is designed for longer training sessions or for sessions that involve time 'out of the water'. Both BOB and BOB+ are to be utilised by simply filling them up with water.

BOB is available in red, while BOB+ is available in yellow.

KEY FEATURES

Realistic adjustable weight: Allows for tailored training sessions to simulate various scenarios, enhancing realism and effectiveness.

Compact storage: Folds flat when not in use, minimising storage space requirements onboard vessels or in training facilities.

Manoeuvrable: Lightweight and easy to handle, facilitating smooth deployment and recovery during training exercises.

Easy to use: Simple filling and emptying process via the head and neck openings, streamlining setup and cleanup procedures.

Cost-effective: Provides an inexpensive solution for man overboard training, offering valuable practice without breaking the budget.

Enhanced buoyancy: Air pocket and closed-celled foam construction ensure buoyancy, allowing the dummy to maintain a realistic 'head up' position in the water.

Recovery assistance: Fitted with straps across the body and legs to aid in recovery, facilitating the use of hooks or poles to bring the dummy alongside the vessel for drills with the Fibreight Cradle.

Adjustable dimensions: Width of 66 cm and length of 174 cm, accommodating various training needs and scenarios.

Weight capacity: Supports weights ranging from 1 kg up to 30 kg, providing flexibility in training intensity and difficulty levels.

Man Overboard Equipment

SKU - 40020798

Fibreight 'BOB+' MOB Manikin

SPECIFICATION

Fibreight 'BOB+' Man Overboard Training Dummy:

- **Dimensions:** 0.6m (Width) x 1.74m (Length)
- **Weight Capacity:** Up to 55 kg

Features:

- Realistic adjustable weight for varied training scenarios
- Foldable design for space-saving storage
- Lightweight construction for easy handling
- Equipped with straps for efficient recovery manoeuvres
- Simple filling and emptying mechanism for user-friendly operation

TECHNICAL INFORMATION

- Width: 0.6m
- Length: 1.74m
- Weight: Up to 55 kg
