Tron 40VDR Spare Silicone Grease Tube

DESCRIPTION

Keep your Tron 40VDR Emergency Position Indicating Radio Beacon (EPIRB) performing at its best with the essential application of silicone grease. Designed for maritime safety, Tron 40VDR EPIRB automatically activates upon water immersion, sending distress signals to rescue authorities. This grease application protects vital components from becoming brittle and cracking due to moisture damage, ensuring reliability during emergencies.

KEY FEATURES

- **Essential Maintenance:** The grease ensures proper upkeep of the Tron 40VDR EPIRB, contributing to its longevity and optimal performance.
- **Protection Against Moisture:** Silicone grease application safeguards critical components, such as internal safety switches and water detectors, from moisture damage.
- **Corrosion Prevention:** By forming a protective barrier, the grease prevents corrosion, preserving the integrity and reliability of the EPIRB.
- **Ensured Reliability:** With protected components when applying the grease, the Tron 40VDR EPIRB maintains its effectiveness during emergencies, providing peace of mind to users.
- **Easy Application:** The grease is easy to apply, making maintenance tasks hassle-free and ensuring the continued readiness of the EPIRB.
- **Extremely Good Lubrication Properties:** The silicone grease offers exceptional lubrication, minimising friction and wear on moving parts within the Tron 40VDR EPIRB.
- **Water Displacing:** Its water-displacing characteristics ensure that moisture is effectively repelled, preventing corrosion and moisture damage to critical components.
- **Insulating:** The grease provides insulation, safeguarding sensitive electronic components within the EPIRB from potential damage.

Tron 40VDR Spare Silicone Grease Tube

SPECIFICATION

- Product Name: Jotron Tron 40VDR Spare Silicone Grease Tube
- Weight: 50g
- Composition: Formulated with silicone for exceptional lubrication properties, water displacement, and insulation.
- Safety: Non-hazardous substance or preparation according to EU Regulation 1272/2008/EC, ensuring safe handling and storage.
- Application: Specifically designed for use with the Tron 40VDR Emergency Position Indicating Radio Beacon (EPIRB) to maintain optimal performance.
- Purpose: Provides essential lubrication, protects critical components from moisture and corrosion damage, and ensures the reliability and effectiveness of the EPIRB.
- Compliance: Manufactured to meet industry standards for marine safety equipment, guaranteeing suitability for maritime applications.

TECHNICAL INFORMATION

- Non-Hazardous Substance: Compliant with EU Regulation 1272/2008/EC
- Weight: Each container contains 50g of silicone grease
