

SOLAS RETRO-REFLECTIVE TAPE

SKU - 40020036

Description

Retro reflective tape is used for illuminating SOLAS life support equipment such as life vests, jackets, and rafts. The SolasFlex tape is an encapsulated lens type sheeting with a flexible and highly transparent plastic film. The tape has been specially designed for the marine and offshore industry.

Our retro-reflective tape conforms to IMO Res. A658(16) and meets USCG specification 46 CFR Part 164.

it is approved wheelmark, USCG, RR and KR.

T-ISS SolasFlex is type 2 approved, this means it can be used indoor as well as outdoor and is suitable for all applications. SolasFlex is a Type 2 solasgrade tape for continuous outdoor exposure.

SPECIFICATION

- 50mm wide
- Self-adhesive, with a paper liner
 - Super high tack adhesive
- Each roll is approx 46 metres (50 yds)
- Weight 1.3kg per 46-metre roll
