Magnetic Ladder Locker

DESCRIPTION

The Magnetic Ladder Locker is a safety device for the maritime industry. Designed to secure ladders in place with powerful magnets, it prevents accidental movement. With over 500 KG of lift and pull ratings, it ensures stability and safety onboard ships.

KEY FEATURES

- **Effortless Removal with Release Handle:** Enables easy and hassle-free detachment of the magnet from the hull, enhancing operational efficiency.
- **Supplied in a Sturdy Wooden Storage Box:** Provides durable storage solution, ensuring the longevity of the equipment and ease of transportation.
- **Includes IMO-type Instruction Poster and Location Sign:** Facilitates clear guidance and identification, promoting proper usage and compliance with safety protocols.
- **Comes with Tightening Belts for Added Security:** Enhances stability and safety by securing the ladder firmly in place during operation.
- **DNV approved:** Meets industry standards and regulatory requirements, ensuring reliability and peace of mind for users.

Complies with IMO / SOLAS A.1045(27): Adheres to international maritime safety standards, ensuring compatibility and suitability for a wide range of vessels and applications.
